**NORTH NATURE**

Our 2019 North Nature collection is inspired by historic camping traditions, which were all about getting out, being at one with nature and enjoying each other's company.

It's an updated take on the simple life with fabulous, comfortable awnings and matching accessories, made for life in the great outdoors.

The design is simple and Scandinavian, with clear references to Isabella's historic camping life.

The colours of our North Nature collection are rustic and faithful to the distinctive Nordic spirit with three style concepts – NORTH, DAWN and FLINT.

# NORTH

The NORTH collection takes you back to nature. To where the camping lifestyle began: under open skies. Without filters – just pure nature and relaxation. NORTH gives you access to an updated, 21st century version of the simple life with added comfort and elegance. The design is simple and the colours are unobtrusive, so your focus remains on appreciating the beauty of nature. Raw and magnificent. Most importantly, the design has clear associations with Nordic landscapes and Scandinavian design traditions.

# DAWN

The DAWN collection is inspired by the misty landscape that greets you in the early hours of the morning, when the atmosphere is fairytale-like and the silence is deafening. Only the quiet breeze whistles faintly. The DAWN collection invites you to experience the undisturbed camping lifestyle where the tempo is slowed down and nature is in focus. The design in the DAWN collection is subdued and blends with mild tone-on-tone colours that give you peace to be present in the moment.

# FLINT

The FLINT collection is inspired by flint as a material that arose naturally in the encounter between sea and earth. Throughout history, flint has played a crucial role in producing fire. FLINT reminds us of our ancestors and their ability to survive in nature in its raw state, with simple resources. The FLINT collection taps into this rustic, unpolished take on nature so you can experience it anew. The historically based design of the FLINT collection is all about power – dark shades of grey meet sharp edges and create a burst of energy.

## PRISMA SEED

Prisma Seed's flexibility, high durability and strong frame make it the ultimate awning for permanent pitching. The front can be moved back and forth to create a living room with a covered terrace (with the use of optional extras).

The large windows ensure that Prisma Seed is a bright, welcoming awning where you will spend many an enjoyable hour. For maximum stability, Prisma Seed is supplied with the Zinox MegaFrame. If you want to use Prisma Seed as a year-round awning, additional poles can be purchased to ensure added stability in the off-peak season.

**Removable/fold-down panels:** Front, side and corner panels.

**Special features:** Flexible front panels, mosquito nets in both sides<sup>3</sup>, ventilation in the front, light strip in the roof<sup>2</sup>, large windows, wide all-round overhang.

**Comes as standard with:** Cube Creme curtains, Wheel arch cover, draught skirt, veranda pole, FixOn, awning bag, pole and peg bags including peg remover.

**Optional accessories for assembly:** Front divider, additional front panels (2 pcs), right or left panel (for partition) which give more scope for variation<sup>1</sup>. Annex 250, net side, Eclipse FSC (Ask your dealer about sizes), door canopy, inner roof, storm securing set.

MATERIALS

TECHNICAL ILLUSTRATIONS

## PENTA FLINT

Penta Flint has everything you require from a permanent pitch awning – a depth of 3.5 m without the nuisance of a centre pole, and designed so that every inch of space is used. The material used is Isacryl, which allows the awning to breathe. Mosquito net windows in both sides, and the numerous opening options, make for an optimal indoor climate.

A sand-coloured roof imbues the awning with a soft warm light and the combination of the light strip in the roof and the large windows of clear film make the Penta Flint awning a bright and friendly place to spend time. The sturdy pole construction and the pentagonal shape mean stability for a long season at the campsite. Choose between the strong Zinox steel frame or the extra-strong Zinox MegaFrame for added stability. The combination of MegaFrame with extra winter securing means you can use your Penta Flint all year round.

Penta Flint is part of the Flint style concept, i.e. a greyish colour scheme inspired by flint as a material. Read more about the Flint style concept on page 5.

**Removable/fold-down panels:** Front, side and corner panels

**Special details:** Overhang all the way around, light panels in middle of roof. Two large side ventilation windows with mosquito nets<sup>1</sup>, corner door right front, two door options.

**Supplied as standard with:** Collage Blue curtains, veranda pole, draught skirt, wheel arch cover, FixOn, pole and peg bags, awning bag and peg remover.

**Optional extras:** Annex 220, door canopy<sup>2</sup>, inner roof, partition wall<sup>3</sup>, storm securing set.

Penta is also available as Penta Thirty. (Cube Creme curtains)

COMMODORE DAWN

## COMMODORE DAWN & NORTH

Commodore is a fusion of classic Isabella design and contemporary materials. Its depth of 3 metres and the choice of three types of frames are a major advantage, especially for those who alternate between permanent pitching and touring and enjoy having plenty of space in the awning. Large panoramic windows make Commodore a pleasant place to be, with a unique inflow of light. For a pleasant indoor climate, the Commodore model has mosquito nets with a foil cover in both sides, as well as an integrated top ventilation panel in the middle of the front. On hot days and balmy evenings, the nets keep out annoying insects, at the same time allowing the air in the awning to circulate.

Commodore is available both as an Dawn and a North model.

Commodore Dawn is part of the Dawn style concept, i.e. a mild and subdued tone-on-tone colour scheme inspired by the misty morning landscape.

Commodore North is part of the North colour concept, i.e. subdued colours with clear references to Nordic nature.

Read more about the Dawn and North style concept on page 5.

## VILLA 550 - 650 - 750 - 850 - 950

### For year-round campers/ permanent pitchers

Villa a unique year-round/permanent pitching awning, available in 5 widths. Its construction has been designed with maximum stability and durability in mind. Isabella Villa is modular, and the choice of front panels means that you can construct your Villa just as you want it. The awning should not only be suitable for use on hot summer days, but also a good alternative when the snow is lying on the ground. Year-round use places high demands on the equipment, and Isabella Villa is composed of the best materials. The optimal sloping of the roof prevents the build-up of snow. Light is life, and the large windows and white curtains contribute to a bright, comfortable

living space. The window material can withstand extreme cold, and Villa is also equipped with flaps in the fabric to make it easy to close and cover the windows as required. The deep overhang all the way around prevents dirt and pollution, so you can spend your days relaxing, instead of on maintenance.

Isabella Villa has been designed to make it easy for you to put up yourself. Your local dealer can also advise you if you wish to have it ready-assembled. The modules are zipped together, simplifying the construction and making it easy to change the front modules without having to dismantle the entire awning.

Isabella Villa is equipped with a padded sluice and connecting piece in the roof, so it can be used on all sizes of caravan (special adjustment may be necessary, especially on small caravans). The caravan can be attached or removed in a few easy steps, though full backing is required (extra) if Isabella Villa is to stand without the caravan. Isabella Villa can also be adapted as standard to mobile homes with a max. height of 265 cm.

placing the awning on a fixed floor measuring 300 x 550 cm, 300 x 650 cm, 300x750 cm, 300x 850 cm, 300 x 950 cm. Talk to your dealer or a local carpenter about this.

NB!

Villa must be mounted on a 10 cm-high floor.

## UNIVERSAL DAWN 360 & 420

Thanks to their great strength and stability, the Universal 420 and 360 Dawn porches can be put up in all weather conditions – all year round. Two support poles press the sewn-in foam pads securely against the side of the caravan, while click profiles hold the sides directly on the support pole for a perfect seal. Universal 420 and 360 Dawn have doors in both sides and large windows across the front, giving a good view. The strong Zinox steel frame ensures good stability. If Universal 420 or 360 Dawn is to be used as a year-round awning, we recommend the fitting of winter securing and an inner roof (optional extras). The roof construction provides unobstructed opening of the caravan door and minimal build-up of snow.

Universal Dawn is part of the Dawn style concept, i.e. a mild and subdued tone-on-tone colour scheme inspired by the misty morning landscape. Read more about the Dawn style concept on page 5.

**Removable/fold-down panels:** Front and side panels.

**Special details:** Ventilation in both sides<sup>3</sup> and adjustable front ventilation. External mud flap<sup>2</sup>, flexible pegging, special sloping roof which makes the awning suitable for year-round camping, extra heavy-duty window film. (frost proof)

**Supplied as standard with:** Collage Sand curtains<sup>1</sup>, veranda pole, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bags including peg remover.

**Optional extras:** Annex 220, Door canopy, inner roof, winter securing set, storm securing set.

**Use:** Year round.

**Fits:** Caravans with awning rail height of between 235 and 250 cm

## WINTER

Thanks to the heavy-duty materials, a special roof angle to prevent the build-up of snow, an extra wide external mud flap, a strong steel frame, flexible pegging and window foil designed to withstand extreme temperatures, Isabella's Winter awning will stay the course – even in a heavy snow storm. The model is made of easy-to-clean polyester/PVC material and has doors in both sides as well as zipped ventilation.

**Special details:** External mud flap, special roof angle, extreme window foil.

**Supplied as standard with:** Set of curtains Bowline Grey, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bag incl. peg remover.

**Optional extras for assembly:** Inner roof, winter securing set, storm securing set.

**Use:** Year round.

**Fits:** Caravans with an awning rail height of between 235 and 250 cm

**Distance between roof poles:** 203 cm.

## AMBASSADOR DAWN

With more than 30 years on the market, our customers rightly expect a lot of the 'Ambassador', the ultimate touring awning which is straightforward to put up. Relatively light in weight, with a depth of 2.5m it offers all the opening options you could possibly wish for. Ambassador Dawn has a mosquito net panel in both sides and is made of Isacryl for a pleasant indoor climate. The roof is coated on the outside and has a patterned inside, which minimises the formation of condensation.

For a good, natural inflow of daylight, and to ensure that the awning is a light and accommodating place to spend time, Ambassador Dawn has large, panelled panorama windows in the front.

Ambassador Dawn is part of the Dawn style concept, i.e. a mild and subdued tone-on-tone colour scheme inspired by the misty morning landscape. Read more about the Dawn style concept on page 5.

3 m, see pages 10-11

**Removable/fold-down panels:** Front and side panels.

**Special details:** Integrated top ventilation<sup>1</sup>, mosquito net in both sides<sup>2</sup>.

**Comes as standard with:** Collage Sand curtains. Veranda pole, draught skirt, wheel arch cover, FixOn, Typhoon storm sashes awning bag, pole and peg bag including peg remover.

**Optional extras for assembly:** Annex 250, door canopy, net side, net front, Cosy Corner II, partition wall, Eclipse front sun canopy, gutter, storm securing set.

## CAPRI NORTH

Capri North is the ideal choice for touring caravanners. In light-weight, breathable, acrylic material the Capri North is quick to erect and easy to transport. The tinted windows make the awning a pleasant place to be, as the large mosquito net windows provide extra ventilation without the annoyance of insects on hot summer days and nights. All front and side panels can be folded down to form a veranda or removed completely. Capri North is available with the Zinox tubular steel frame or the ultra-light CarbonX fibreglass frame.

Capri North is part of the North colour concept, i.e. subdued colours with clear references to Nordic nature. Read more about the North style concept on page 5.

## MAGNUM FLINT 340 & 400

Magnum 340 and 400 Flint are touring-friendly porches, which are quick to put up when you're on the go. With Magnum 340 or 400 Flint, you get a spacious touring awning with a depth of 2.5 metres and a width of either 3.4 or 4 metres. The front and side panels can be folded down/removed and, together with two mosquito net sides, offer a wealth of ventilation options.

If more space is required, inside or out, Magnum 340 and 400 Flint can be extended with an Eclipse front sun canopy (specially designed for Magnum), Cosy Corner (specially designed for Magnum), and an annex giving you an extra bedroom or additional storage space. Magnum 340 and 400 Flint are made of Isacryl, which ensures a good indoor climate.

Magnum Flint is part of the Flint style concept, i.e. a greyish colour scheme inspired by flint as a material. Read more about the Flint style concept on page 5.

**Removable/fold-down panels:** Front and side panels.

**Special features:** Extra long roof wings for additional strength and optimal fit, full length canopy providing extra shelter, mosquito net in both sides<sup>1</sup>. Ventilation in the front. Large front window.

**Comes as standard with:** Collage Blue curtains, wheel arch cover, draught skirt, side veranda pole, FixOn, awning bag, pole and peg bags including peg remover.

**Optional extras for assembly:** Annex 250, Cosy Corner II special, Eclipse FSC special, Net Front Panel, Net Side, veranda pole and support pole (400), storm securing set.

Suitable for caravans with awning rail heights between 235 cm and 250 cm.

Distance between roof poles 340: 313 cm, 400: 382 cm.

## MINOR DAWN

When it has to be easy, smart and comfortable, Minor Dawn is the answer. Minor Dawn comes with a lightweight CarbonX fibreglass frame – which is fast and easy to assemble. The window in the removable front panel provides a natural inflow of light and a good view. There are doors and a mosquito net in both sides, which can be closed by zipping the foil cover over it. The material is breathable Isacryl which helps create a pleasant indoor climate. As with all of Isabella's porches, you get the best seal to the caravan.

Minor Dawn is part of the Dawn style concept, i.e. a mild and subdued tone-on-tone colour scheme inspired by the misty morning landscape. Read more about the Dawn style concept on page 5.

**Removable/fold-down panels:** Front panel.

**Special details:** Mosquito net<sup>1</sup> and entrance door in both sides.

**Supplied as standard with:** Set of curtains Collage Sand, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bag incl. peg remover.

**Optional extras for assembly:** Veranda pole, storm securing set.

**Fits:** Caravans with awning rail heights between 235cm and 250 cm.

## ECLIPSE SUN CANOPY

Not only is Eclipse suitable for use as a front sun canopy on Isabel-la's awning models, but it can also be used as a lightweight touring sun canopy directly on the caravan. Eclipse is fastened to the overhang of your awning, creating a lovely shady terrace and increasing the area under cover. The lightweight CarbonX frame with the IsaFix connection system as well as the TectumPro building system, make it fast to put up. Alternatively, for extra stability a Zinox MegaFrame option is available. For extra shelter, a side can be purchased as an optional extra. It fits both the left and right-hand side of the front sun canopy.

Eclipse and the shelter side can also be used on Magnum 340 and 400. Eclipse is also available in a mini version, which is 150 cm deep. Mini Eclipse is available in G14-G21 and must be mounted on the awning for use (cannot be mounted directly on the caravan).

**Depth:** Eclipse 225 cm / Mini Eclipse 150 cm

**Supplied as standard with:** CarbonX/MegaFrame frame with Tectum Pro system (Tectum Pro is a revolutionary connection system for simple click assembly<sup>1</sup>) and F-link (F-links to be added to the awning poles<sup>2</sup>), Typhoon storm sashes, transport bag.

**Optional extras for assembly:** Side (right/left). The side panel (optional extra) for Eclipse is easily assembled using plastic connecting strips. The side panel can be used on either the left or right hand side. Optional extra the Eclipse side with side adaptor when used directly on the caravan, (261000416)<sup>3</sup>

## COSY CORNER II

If you need shelter or simply good screening by the door, where you can sit and soak up the atmosphere at the campsite, Cosy Corner II is the perfect solution. Depth approx. 150 cm. Cosy Corner II is easy to assemble by virtue of its sewn-on beading and connection sections as well as Tectum Pro and lightweight CarbonX poles. Cosy Corner II can be positioned to the right or left of the doors at the front of the awning. If you would like a larger cosy corner, two Cosy Corner II's can be placed next to each other to form an extra angle.

Please give the awning's A-measurement when ordering!

# ANNEX

## Find an Isabella annex to fit your awning

Need more storage space or an extra bedroom in the awning? Isabella offers various solutions.

Annex North and Annex Grey are tall annexes offering maximum height. Here, you have a choice of a CarbonX or a Zinox frame.

Annex Sand also has a maximum height but comes with a steel frame.

All Isabella annexes are equipped with an extra zip so the awning's side panel can be used as a partition wall.

### 5 PARTITION WALL FOR ANNEX

Materials: Cotton.  
Size: 220, 250 or 300 cm.

## WINDSCREENS

All windscreens from Isabella are supplied with poles (including rafter poles), guy ropes, pegs and the Stabilo system as standard.

- 1 LINEA / VENTUS** – 4-sided.  
 Measurements: 460 x 110 cm.  
 Weight: 5,6 kg.  
 Material: Acrylic/PVC.  
 Linea: Tinted foil  
 Ventus: Net material  
 Colour: Granite/Black.  
 Standard: CarbonX poles.
- 2 GREY** – 4-sided.  
 Measurements: 460 x 110 cm.  
 Weight: 5,7 kg.  
 Colour: Granite / Antracite-coloured trim  
 Material: Isacryl  
 Standard: CarbonX poles.
- 3 NORTH** – 4-sided.  
 Measurements: 460 x 110 cm.  
 Weight: 5,7 kg.  
 Colour: Granite / Cinnamon-coloured trim  
 Material: Isacryl  
 Standard: CarbonX poles.
- 4 SUN** – 3-sided.  
 Measurements: 460 x 130 cm.  
 Weight 8,5 kg.  
 Colour: Grey.  
 Material: Coated polyester.  
 Standard: Zinox poles.
- 5 GRANITE** – 3-sided.  
 Measurements: 460 x 130 cm.  
 Weight 8,5 kg.  
 Colour: Granite.  
 Material: Acrylic.  
 Standard: Zinox poles.
- 6 FLEX GREY** – 3-sided.  
 Basic measurements: 460 x 140 cm.  
 Weight 8,3 kg.  
 Material: Coated polyester.  
 Standard: Zinox poles.  
 The basic model may be extended as required by adding more zipped panels to the middle
- 7 PANELS**  
 Panel measurements: 154 x 140 cm.  
 Standard: Zinox poles

## 8 THE STABILO-SYSTEM

The StabiLO-system consists of loose earth spikes and support feet. The system ensures that windscreens remain securely in place at all times. The system is supplied as standard with all windscreens, though the support feet are also available separately for use with awnings.

# ACCESSORIES

**1 DOOR CANOPY**

Fits Commodore, Ambassador, Capri North. Also available specially for Prisma, Penta and Universal 420 and 360.

**2 NETFRONT**

Fits Commodore, Ambassador, Capri North and some older models (in sizes G14-G20)

**3 NET SIDE**

Available for awnings with 3 m or 2.5 m deep sides.

**4 WINTER SECURING SET**

Available for Universal 420 and 360 and Winter.

**5 INNER ROOF**

Available for Prisma, Penta, 3 m and 2.5 m deep full awnings, Universal 420 and 360 and Winter.

**6 PARTITION WALL**

Available in two sizes to fit all Isabella awnings with a depth of either 2.5 m or 3 m. Also available for Penta.

**7 DOOR CANOPY TO CARAVAN**

**8 ALUMINIUM ROOF GUTTER WITH SPOUT**

**9 UNIVERSAL WHEEL ARCH COVERS FOR THE CARAVAN**

# Isabella Flooring Concept

## Isabella – layer upon layer

Start by laying Ground Cover over an area bigger than the awning to protect the mudflaps and awning materials. Then lay Isabella Floor over the entire awning area, remember the edging strips for a neat finish especially in doorways. A Comfort Carpet keeps the heat in and is soft and comfortable to walk on. Finally, lay an Isabella Carpet for a beautiful finish that's easy to keep clean.

### 1 ISABELLA GROUND COVER

is the perfect underlay – a thin but strong sheet that lies on the ground, it protects the awning canvas from soil and mud, and because the mudflaps are not in contact with the ground they are easier to clean.

Supplied on rolls of 2 x 18 m (36 m<sup>2</sup>). Ground Cover is fully breathable and suitable for touring sites.

### 2 ISABELLA FLOOR

If you spend a lot of time in your awning, you want good insulation, and a floor that is smooth and level. Isabella Floor offers a full range of advantages. It is easy to install without the use of tools, the 50 x 50 cm tiles simply snap together like building blocks, no other parts are needed. It is easy to store and exceptionally durable.

### 3 ISABELLA GROUND SHEET

The Isabella Ground Sheet is available in different sizes to fit the awnings. Put it under the awning carpet to avoid moisture from the soil. Isabella Ground Sheet has plastic reinforcements in the corners with ring for pegging and reinforced edges, so it will last for years. Colour: Anthracite. Material: PU 160 g/m<sup>2</sup> Depth: 270, 320 or 370 cm Lengths: 500, 600, 700 or 800 cm

### 4 ISABELLA COMFORT CARPET

is a soft, insulating comfort underlay which is placed between the plastic barrier or wooden floor and the awning floor covering to keep cold and damp at bay. It also provides a soft floor area to sit and walk on. Supplied on rolls of 1.5 x 15 m (22.5 m<sup>2</sup>).

### 5 ISABELLA CARPET

Page 44

Camping comfort starts at floor level

Isabella's Flooring Concept gives you a host of options, no matter how you camp. We have developed a concept that allows you to customise the different elements to your actual needs. You get the ultimate solution, whether you're permanent pitcher, a touring caravanner, a year-round caravanner, a summer caravanner or...

The underlay types are the same – it's the composition of them that makes all the difference. You can focus on what is most important to you and your way of camping: stability, finish, cleaning or comfort. Here are three suggestions:

1

## FOR THE TOURING CARAVANNER

**who travels around and values comfort and easy cleaning highly, we recommend:**

- ISABELLA GROUND COVER... to protect the awning from mud.
- ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

2

## FOR THE SEASONAL CAMPER

**who remains in one place and values comfort and easy cleaning highly, we recommend:**

- ISABELLA GROUND COVER... to protect the awning from mud.
- ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- ISABELLA COMFORT CARPET... for an insulating, soft comfort.
- ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

3

## FOR THE PERMANENT PITCHER

**who always stays in the same place and values comfort, a firm surface and easy cleaning highly, we recommend:**

- ISABELLA GROUND COVER... to protect the awning from mud.
- ISABELLA FLOOR... for a firm, even floor.
- ISABELLA GROUND SHEET... to prevent moisture from rising up from the ground.
- ISABELLA COMFORT CARPET... for an insulating, soft comfort.
- ISABELLA CARPET... for a beautiful finish that is easy to keep clean.

**For more information about the Isabella Flooring Concept, visit [Isabella.net](http://Isabella.net).**

## ISABELLA CARPET

### Comfortable flooring for your awning

Isabella Carpet matches your Isabella awning perfectly and in a choice of quality to suit your camping needs. Our quality carpets are made in a smooth-woven combination of nylon threads, spun with PVC and finished in a heat press, so they can be fitted to any awning and even trimmed without fraying; they are lightweight and can be easily folded and cleaned.

**Premium:** smart, high quality design.  
**Regular:** unique strong weave.

**PREMIUM**

- 5A Sol 2,5-3,0-3,5 m
- 5B Frigg 2,5-3,0-3,5 m

**REGULAR**

- 5C Freja/Light Grey 2,5-3,0 m
- 5D Trud/Dark Grey 2,5-3,0 m
- 5E Idun/Blue 2,5-3,0 m

## ISABELLA FLOOR

With the option to purchase edges for Isabella Floor, you can create a beautiful finish.

Isabella Floor uses a unique interlocking system.

**ISAGRIP**

IsaGrip is a clip used to hold carpets and underlay in place. IsaGrip is easy to fit without damaging the carpet. 900060290

## Attention to detail is a focus on quality

The famous German architect Ludwig Mies van der Rohe stressed the value of attention to detail most poetically: "God is in the details". Without attention to detail, the quality will never be the best it can be. And that is why Isabella pays such attention to detail. Of course an awning can look good from a distance, but Isabella wants it to look good up close, too.

### Function and ease of use

Smart, carefully considered details ensure simple function and ease of use. The same carefully considered details also ensure durability. An awning is an investment that must hold its value. Both its utility value – holiday after holiday – and its sales value in the event that the Isabella awning is sold on to happy, new owners.

**DropStop™ rain grommets are fitted to all rivets in the roof.**

**Substantial four way zips, always run smoothly. Hard wearing and always covered to protect from sun and rain.**

**Storm Securing PVC triangles are firmly sewn under windows for optimum position of IsaLink™.**

**All Isabella awnings have ventilation panels; some are fitted with extra panels and/or mosquito net(s) in the side, these reduce condensation and create the best indoor climate.**

# Ventura & Ventura Air

## What you see is what you get

Ventura is a basic range of tents and awnings in the Isabella family. The range is inspired by the simple life – uncomplicated and with a focus on basic needs. Sturdy materials that stand up to the rigours of use. And just a few carefully considered, tried-and-tested features.

- Ventura is a good place to start if you're not looking for the ultimate, which the Isabella range otherwise represents.
- What you see is what you get: simple design and good quality. And at a price that makes camping accessible to everyone.
- The range has been created to go perfectly with Isabella accessories.

## MARLIN

Marlin is the maintenance-friendly porch, which is ideal for touring. All panels can be removed and its practical size and mosquito net window make Marlin a pleasant and cosy living room. It is easy to put up and is supplied with the lightweight IXL fibreglass frame.

The porch has a good seal to the side of the caravan with the sewn-in foam pads and the connection set supplied.

**Special details:** All panels can be folded down or removed. Mosquito net window in one side with zipped external foil cover<sup>1</sup>.

**Supplied as standard with:** Screw-free FixOn fittings, Luxor Grey curtains, draught skirt, standard wheel arch cover, awning and pole bag, peg bag.

**Optional extras for assembly:** Isabella Annex 220, which can be zipped to either side of the awning.

**Fits:** Caravan heights between 235 and 250 cm

**Distance between roof poles:** 313 cm

## Three Isabella premium products

Today, Isabella offers three different types of poles: Zinox steel poles, Carbon-X and the latest addition, Zinox Mega Frame.

Zinox steel poles lend themselves to permanent pitching, universal and winter awnings. Carbon-X: Best for touring awnings and Isabella's lightweight awnings. Zinox Mega Frame is for year-round awnings.

### CarbonX™ frame

a carbon-fibre reinforced fiberglass frame, is suitable for both permanent and touring caravanning. Carbon Fibres are combined with glass fibres in varying amounts, according to pole diameters, to offer maximum strength. The frame is light and fully corrosion resistant. All CarbonX frames are supplied with the IsaFix locking mechanism. With IsaFix in place, keeping the frame in position is easy. With one press of the hand grip, a discreet "click" tells you IsaFix is locked in position.

### Zinox™ steel frame

is hot galvanized both inside and out to extend its life and to meet all load bearing requirements. The steel frame is made of ISO-certified steel. The strength of the Zinox steel frame makes it particularly suitable for pitching your caravan permanently – and it is included with all Universal and winter porch awnings, because caravanning in the off-peak seasons demands great structural stability due to weather conditions such as strong winds and snow.

### Zinox™ MegaFrame

The Zinox MegaFrame is a durable tubular steel frame (material thickness: 32 mm/1.2 mm) with welded corners and MegaFix on the poles. MegaFrame is designed for year-round use with a full awning which can remain standing all year, and can withstand powerful storms, snowfall and torrential rain. The Zinox MegaFrame is supplied with two extra rafter poles, as well as one Hercules 32.5 mm.

### ZINOX

### ZINOX MEGAFRAME

#### CarbonX layers

- 1 Lengthwise fibreglass reinforced with carbon
- 2 Cross winding
- 3 Lengthwise fibreglass
- 4 Clockwise cross winding
- 5 Anti-clockwise cross winding
- 6 Lacquer

#### IsaFix™ locking clamp

included on all CarbonX frames or update your own fibreglass frame! IsaFix can be fitted easily to any Isabella frame, replacing telescopic couplings and wing nuts for quick and efficient assembly of the awning frame.

#### T-Rex™ locking mechanism

for the Zinox steel frame locks the poles in place and keeps them tensioned in all weather conditions with one press of the hand grip and a discreet "click".

#### Zinox layers

- 2 Steel
- 3 Aluminium/Zinc
- 4 Lacquer

**VENTURA – PRENOX STEEL FRAME**

The external zinc coating of the steel frame is 50% thicker than traditional surfaces, for extra long life.

**VENTURA – IXL FIBREGLASS FRAME**

Light-weight and corrosion resistant frame. The fibreglass frames for full awnings have Fibremax rafter poles with a mighty 30.5 mm diameter.

**VENTURA AIR – AIR TUBES**

Ventura AIR is an advanced air tube system with patented coupling modules that ensure proper attachment and easy adjustment and replacement. The air tubes have a pump connection, high-frequency welds and double-coated sleeve to ensure a good fit.

**FIXUS™**

All IXL fibreglass frames are supplied with Fixus™ Locking clamps. With Fixus in place, keeping the frame in position is easy. With one press of the hand grip, a discreet “click” tells you that Fixus is locked in position.

**FIXON™**

FixOn screwless brackets. Designed for better tensioning, with easy positioning.

**Black angles** Door openings.

## EXCEPTIONAL MATERIALS

Isabella uses only the best materials, made by the world's leading suppliers.

**Isacryl** is a spinneret-dyed (i.e. the fibres are dyed), textured-weave, durable acrylic material. Isacryl has the highest achievable fade-resistance thanks to the pigmentation method. The density of the weave plus the impregnation all the way through prevent water ingress. Nevertheless, Isacryl is a breathable material, which facilitates the best possible indoor climate in the awning.

**Isacryl Light** is a spinneret-dyed (i.e. the fibres are dyed) extra lightweight acrylic material, making it especially suitable for touring.

**PVC/Polyester** is intensely resilient and water resistant material.

**IsaLite** is a coated polyester material, which is durable, lightweight and easy to keep clean.

**The window foil** is the best available on the market. In some of the models, the window foil is also tinted to tone down the sun's

rays, and in awnings for use in winter, a foil is used which can withstand sub-zero temperatures.

All Isabella awning **roofs** are made of strong, UV protective acrylate-coated polyester, with an added top coat to help prevent the build-up of dirt. The roof fabric is impregnated. The inside is patterned to create a pleasant indoor environment, and this also helps make any dirt on the outside less noticeable.

## CURTAINS

All Isabella and Ventura awnings are supplied with curtains. The curtains are carefully designed to match the awning colours for a harmonious look. The specially developed curtain system ensures that it is easy to put up and take down again.

All Isabella curtain materials are given a finishing treatment to withstand environmental impacts, such as mould, rot, fungi or mildew, usually caused by differences in temperature. This special finishing treatment can be restored after washing by ironing the curtain.

**Luxor white**

**Luxor Grey**

## A-MEASUREMENT

To determine the "A-size": Park the caravan on level ground. The "A-size" is the length from ground level, through the awning channel and back down to the ground. This

can be done easily with a piece of string. We have a database of caravan sizes from 1970 onwards on our website, [www.isabella.net](http://www.isabella.net). For Porch/Part awnings the caravan channel height determines the fit.

Full awning  
----- as large porch

..... As small porch

..... Magnum

----- Minor

## FULL AWNING AS LARGE PORCH

All Isabella full awnings can also be used as part awnings. Using a foam pad, support pole and two click profiles. Measure your caravan "Full awning as large/small Porch" as shown and match to the nearest Isabella "A" size. This solution works for new and older models the parts are all supplied as optional extras.

We make every effort to ensure perfect colour reproduction, but owing to printing limitations, colour differences may occur.

**Copyright © 2018 Isabella A/S**

All information on this page and all pages in this catalogue are protected by copyright. It can not be distributed partly or entirely without the written agreement from ISABELLA.

**Service agreement**

A full service agreement is supplied with all goods, a copy is available on request. In the unlikely event of complaint, the deadline is 24 months from the date of purchase. If you find cause for complaint on articles used privately and for the purpose intended, pls. follow the procedures detailed, and report the problem to the retailer with whom the contract of sale was made. NB Other uses may not be covered. Isabella gives not only the statutory warranty, but a 2-year guarantee on all our products.

If you have just bought a new Isabella awning, by signing up and registering your awning with Isabella Club, you get 1 extra years warranty, i.e. a total of 3 years warranty valid from date of purchase.
